

ILITHO™
Digital Offset Printing

hello

how can we help you?

ILITHO offers new digital offset reproduction technology that is the standard of excelence. We provided a full service for clients, from marketing and advertising advice through to quality design and final production.

We pride ourselves on our personalized service and innovative thinking. We use state-of-the-art digital printing technology to produce sharp black lines and vibrant colors. Whether you're printing straightforward text or full color brochures, postcards, flyers, posters or conference materials, our equipment and experienced technicians ensure a quality result, every time.

Digital printing is an ideal alternative to offset printing, especially when time isn't on your side or you only need a relatively small quantity produced (short run printing of less than 2,000 copies). Our digital presses are equipped to handle almost any paper size or weight and we can print one color or full color projects on demand.

1 / preliminary assesment

Processes and procedures that occur between the creation of a print layout and the final printing.

The procedure includes the manufacture of:

- Data editing
- Paper select, choosing a proper paper is also a very important step in prepress.
- Manufacturing of a high-quality print (PDF) file, which is used for the final printing.
- Setting
  Reproduction technology that is the standard of excelence. We provided a full service for clients, from marketing and advertising advice through to quality design and final production. We pride ourselves on our personalized service and innovative thinking.

  Digital printing is an ideal alternative to offset printing, especially when time isn't on your side or you only need a relatively small quantity produced (short run printing of less than 2,000 copies). Our digital presses are equipped to handle almost any paper size or weight and we can print one color or full color projects on demand.
- Proofing, involves creating an accurate facsimile of the artwork before beginning production runs.

2 / quality control team

From start to finish, ILITHO Control Department works to maintain the highest possible standards so that you can be sure that the product that reaches something you can rely on ILITHO Quality Control Team.

They ensures that all its processes follow the SOP (Standard Operation Procedure) and monitors production. During production, operators have to check registration, color adjustment and other key quality indicators to ensure quality is steady from beginning to the finished products.

We use state-of-the-art digital printing technology to produce sharp black lines and vibrant colors. Whether you're printing straightforward text or full color brochures, postcards, flyers, posters or conference materials, our equipment and experienced technicians ensure a quality result, every time.

3 / finishing

Post press makes the crucial difference it is not until the finishing stage that a print product takes its final form. The quality of finishing work has a decisive impact on the final product's quality.While some printing jobs are delivered as printed, most printing is usually not complete until it is converted into a "finished" product. Our Post press includes various types of finish work such as trimming, embossing, foiling, diecutting, scoring, and folding and bindery.
